ning of each regular issue of the PCT Gazette.

(54) Title: METHOD OF PRODUCING HERPES SIMPLEX VIRUS AMPLICONS, RESULTING AMPLICONS, AND THEIR
USE

(57) Abstract: The present invention relates to a method for producing herpes simplex virus (HSV) amplicon particles which in-
cludes co-transfecting a host cell with the following: (i) an amplicon vector comprising an HSV origin of replication, an HSV
cleavage/packaging signal, and a heterologous transgene expressible in a patient, (ii) one or more vectors individually or collectively
encoding all essential HSV genes but excluding all cleavage/packaging signals, and (iii) a vhs expression vector encoding a virion
host shutoff protein; and then isolating HSV amplicon particles produced by the host cell, the HSV amplicon particles including the
transgene. Also disclosed are a system and a kit for preparing HSV amplicon particles, HSV amplicon particles prepared according
to the process of the present invention, and their use.
